

DEPARTMENT OF EARTH AND ENVIRONMENTAL SCIENCES (EES) College Colloquium Events

Location 1: Room 212 Natural Science Building

3-4 pm: Scavenger Hunt! Current EES students will lead tours using a scavenger hunt of EES facilities: visit research labs, meet students and faculty, find your GLG class and lab rooms. This event provides students with the opportunity to speak candidly with current students. Prizes awarded for participation in the hunt. Groups will depart at 3:05, 3:20, and 3:35 pm.

4-6 pm: Sciencing it Up! Demonstrations, discussions, and details of the Earth and Environmental Sciences Majors. Anyone is welcome to visit and explore these science topics and events. Students and faculty will be available during this time to speak to current and potential students. Some specific events include:

- Majoring or Minor in Environmental Sciences
- Bismuth Crystal Growth Demonstration
- Rotating Dynamics
- Rocks inside and out
- Hydrology across a Landscape
- EES Graduates Recommendations to Current Students
- Navigating D2L EES Student Resource Community
- Welcoming Transfer Students
- Undergraduate Research Opportunities in EES
- Employment Opportunities in EES
- Dual Majors and minors for EES students
- Still Undecided Major? EES is the place for you!

Location 2: Outside Room 238 Chemistry Building

3:30 - 4 pm: Are you a major in another discipline, but interested in environmental science? EES is a dynamic and applied discipline that is fundamentally interdisciplinary - EES faculty are jointly appointed throughout the college and university. We want to reach out to students that would like to apply theoretical knowledge to the real-world problems addressed by EES. At this event, meet with faculty members to discuss double majoring or dual degree options.
